INTRODUCTION TO OUR 11TH ANNUAL SALERS BULL AND FEMALE SALE

This will be our 11th Annual Sale, thanks for the encouragement of Bob Perlich. We have been raising Salers cattle for 31 years. We have in our AI program been using semen from the best bulls available and also Embryos from some proven cows. Almost every buyer comments on the quiet disposition of our bulls, we breed for docility and treat them as gentle as possible. Calving ease and birth weights are important to us. We have made great strides in reducing calving stress by using proven easy calving bulls. We believe calves that are born unassisted usually suck shortly after birth, cows are able to get up 1'm after calving less stress on cows and calves and producer. The cows also bred back earlier, better conception rates. This year we have not pulled a single calf, out of a heifer, all born unassisted. You can buy with confidence that the bull calves from 2 year

PAIRS

12 purebred cow calf pairs, 6 Reds and 6 Blks.

Calves were all born unassisted, vaccinated with ScourGuard Bos 9, healthy strong calves. Sire by GIT 52E blacks, the reds by 6Y, noted for calving ease and disposition.

We have sold a number of these 2 year old hfrs to purebred operations with very good reports. Here is an opportunity for the purebred Salers breeders to get some strong out cross genetics into their herd.

These heifers have lots of milk with good udders and teats and a good disposition hard to match. If you are considering getting into the purebred Salers business here is an opportunity to start on the right foot.

There is also the opportunity to sell off the bull calves next spring. Calves can be registered.
