Welcome to our 13th annual sale. We bring you a good set of bulls again this year. We continue to source A.I. sires and select herd sires that work for you and us. We build our herd retaining their daughters. Our ideal animal is a moderate framed, quiet, easy calving yet possesses heavy muscle, feet and sound all around. We offer cattle specifically bred to meet the tough economic realities of today's commercial herds. They will work hard for you and make you happy come fall run. Dennis has some awesome calving ease bulls this year, would be nice to have 50 of them!!

Calving 2018 was a brute. We will all agree 2019 has been so much better.

Our kids and family are happy and healthy and we were blessed with a good hay and green feed crop. We too are grateful for the support we have received from all. For everyone that took time out of their busy schedule to make it to our sale, we appreciate it!!

Dennis and I are proud of our herd and would like to invite you out to the farm to show you the dam's and these bulls prior to the sale. Your welcome to phone, text or e-mail us on any questions you have. See you sale day!

 Check out all the **BULL VIDEOS** on each of our websites!

GURNEY LAND & LIVESTOCK

Box 1916, Fort Macleod, AB T0L 0Z0

What a privilege to invite you to our Bull Sale! We are grateful for the support of all of our customers, our mentors, our sale partners, and all the outstanding people in this industry that we are lucky enough to work with.

We are very proud of this year's line-up of bulls. We've raised the bar again and you'll see it in their EPDs, pedigrees and visually. We continue to breed for calving ease with growth and performance, docility, and picture-perfect udders and feet. Despite this year's very dry conditions in our area, we were pleased with the weaning weights this fall and how well their dams kept their condition. We also feed out our own calves, so we have a front row seat to watch how well their offspring flesh and marble. You can be confident in these bulls! Make sure you watch the videos at gurneyangus.com or on YouTube.

We will be hosting an Open House (or should we say Open Barn?) on Saturday, March 9th from 10:00 am -4:00 pm. If you have time, drop in and have a visit, enjoy some treats and see these bulls for yourself. You will not be disappointed! Of course, you're always welcome to stop by at your convenience to see the bulls and their mommas in person any day between now and Thursday March 14th.

Again we would like to thank all of you who have supported our family and our program over the years-we truly appreciate it! We hope to see you in March!

BULL MANAGEMENT

Yarrow Creek Farm & Ranch

The sale bulls were raised on milk and grass (no creep). Bulls are weaned first week in September and introduced to a low % grain (oats/barley) ration and free choice hay. Ration is gradually increased for growth and gainability. Lots of straw at all times.

HERD HEALTH

The Fort Macleod Veterinary Clinic is pleased to provide Veterinary services to Yarrow Creek Farm and Ranch. They have a well-developed herd health program. All breeding females receive an annual vaccination with the Express line of vaccines ensuring some of the best protection against IBR, BVD Type 1 and 2, BRSV and PI3 as well as a complete scour vaccination protocol. Calves receive vaccinations at birth (Inforce) and at weaning calves are properly vaccinated with Pyramid 5 Presponse and a 7way Clostridial Somnus vaccine. Breeding females are boosted prior to breeding with the Express line of Vaccines. The herd receives routine deworming and ectoparasite control. This year all Bulls entering the sale will have received their first dose and booster dose of Fusoguard to aid in the reduction of Foot Rot. You can be confident that the Bulls purchased from Yarrow Creek Angus come with a solid health foundation. All cows and heifers receive Scour Bos annually
Dr. Bruce Kostelansky; DVM

PLEASE BRING YOUR CATALOGUE SALE DAY!

BULL MANAGEMENT

Gurney Land & Livestock

All cows are run under commercial conditions, meaning the calves get no special treatment like creep feed and the cows are wintered on pasture. The bulls were weaned on September 4th and Herd Health protocol (below) was followed. Bulls are fed 1% of their body weight of rolled barley and a mix of 2nd and 3rd cut alfalfa silage.

HERD HEALTH

The Fort Macleod Veterinary Clinic is happy to provide veterinary service to Wes and Carolyn Gurney. We are involved with all of Gurney's operation including breeding soundness evaluations. Currently all calves receive vaccinations at birth (Inforce) and a 5 way viral modified live vaccine with Pasteurella and a 7 way Clostridial Somnus vaccine at weaning (Pyramid 5 with Presponse and Fermicon 7). All bull calves have received treatment for both ecto and endo-parasites. Bulls will also have received their first dose of Fusoguard to aid in the prevention of foot rot.
Dr. Bruce Kostelansky; DVM

SIGHT UNSEEN PURCHASES & SALE DAY CONTACTS

We will winter your yearling bulls FREE OF CHARGE until APRIL 1, 2019. After that, feed cost of \$2.00 per head per day will be charged. All bulls returning to the consignors' must be insured. All bulls will be housed at buyers risk, the consignors will not be responsible for any type of injury while the bulls are in their care.

INSURANCE:

Stockmens Insurance : Cheryl Brown – 403-601-3460

DELIVERY:

We offer FREE DELIVERY within 200 km. of home; extra mileage will be at cost. Take your bull home sale day and you will get **\$100** off the purchase price.

ANNOUNCEMENTS

Announcements sale day take precedence over the printed material.

INDIVIDUAL BULL DATA

Weights, scrotal measurements and semen test Sheets will be available sale day.

**Please join us after the sale
for a visit and refreshments.**

CALVING EASE

1 star *	means a bull is recommended to be used on cows
2 stars **	means the bull should be used on cows or larger type heifers
3 stars ***	means there should be few problems when using these bulls on first calf heifers.

Remember to take into account your own cow herd management, genetics, environment, feeding conditions, etc. They will have a BIG influence on your birth weights.

I have 10 bulls this year from this mighty herd sire. Average daily gain = 3.72. All of his progeny line up so close phenotypically and show that deep flank and that strong deep top just like their sire Whiskey Jack. WJ had an incredible personality and was nice to have around. I have kept all of his daughters.

A complete herd sire package here. This big hipped smooth fronted SAV Renown 3439 son also has a picture perfect dam. Johnston Livestock claim he is one of their best. His YW Index was 117. His calves are born easy and put on pounds fast, true to the Renown progeny. Great combination to enjoy.

My most consistent calving ease plus growth performance bull this year. This deep sided easy fleshing A.I. sire has produced 2 whopper yearling bulls; 29F and 32F. His dam SAV Erica 9448 is as impressive. Couple low birth calving ease with superior phenotype in a moderate frame. +75 WW & +124YW EPD's. Thrive 5054 sold for \$52,000 at the 2016 Schaff Angus Valley sale.

YW EPD 145! 3rd Dimension is a high capacity bull carrying an abundant amount of depth of body and lots of rib. I have used his sire, Jindra Double Vision, also in our A.I. program with great success. 3rd Dimension showcased a 874 WW for a ratio 115 and a 1584YW for a ratio of 117. An exceptional dam with almost matching EPD's. Can not loose here.

I selected Redemption as my go to A.I. bull for heifers again this year; just nothing out there with his kind of numbers. Redemption's EPD's are still one of the best; he is in the Top 1% & 2% for BW, YW, CE, MCE, and Marbling and with accuracy's of +90% he is a true calving ease performance bull, with awesome maternal traits. He was also the #1 selling A.I. sire for Genex and also the Red Angus breed #1 registration sire in 2018 for North America. We have Redemption dams that are absolutely fantastic; good milk, feet, udders all packed in a fleshy moderate size. Just like Neil Hueftle (Hueftle Red Angus) in Cozad, NE stated; "sometimes he had wished he had never let go of her. One of the best cows he has ever raised" Well he was right.

Back in 2014 when we purchased APEX we knew he was a good bull but we didn't know how good. Well after 3 calf crops and females now milking you really find out how good a bull truly is. With his dark deep cherry red color with pigmented feet he passes that on nicely but where he truly has shined is in Calving EASE. He went from a -1.2 BW to a -4.3 BW (Top 5% averaging 81lbs on calves). Also on CE went from a +7.0 to a +12.0 (now top 1%). His Yield grade, Ribeye and Fat are all in the top 10% too. He has ultimately changed our herd to the better.

We had only kept Oasis as a spare and had not used him for a couple of years. But standing in the pen with our cows you just can't help to notice how the Oasis females just stand out as mother cows with good milk, good udders and feet that are correct and true. These daughters have surprised me with their performance and maternal quality's. Phenotypically they are what we at Yarrow Creek are definitely looking for into the future. He's also in the top 1% for REA. This is the last year Oasis calves as we had to let him go. His calves are averaging 87 lbs BW.

We had selected a 116B a Mama's Boy son from U2 to carry on the Mama's Boy 167X line as I was really impressed with bulls. 116B is definitely following in his sire's foot steps. His calves are averaging 80lbs and having YW index's of 106; so we know these calves perform. He is also a good carcass bull with EPD's at 8%, 9% & 8% in Yield Grade, REA, and Fat. You don't find many bulls with those kind of carcass numbers in ALL those traits. He's definitely a carcass grade improver.

I selected Seedstock as my A.I sire on my cows this year to improve the maternal side of my herd. Blackcap May 4136 is a tremendous donor cow that is perfect in every way. If you look at most of the top SAV Herd bulls out there, chances are Blackcap May 4136 is in the pedigree. I have been blown away with the stoutness and dimension of his offspring. There's no sacrifice of performance in his calves either- he seems to be the whole package!

20F is a herd sire in the making. He has impressed us with his rib capacity and depth of body and he definitely caught the photographer's eye! 20F is as quiet as they come. His maternal brother sold last year to Chris Dedeurwarder of Rimbey. 20F's Dam is an excellent Hoover Dam daughter, which means lots of milk and great feet and udder structure.

Red YCR Firehawk 1807F is a Redemption son out of a daughter from our treasured Lauron Jill 92Z cow; wow what a cow she turned out to be. She only had one daughter Jill 1543C and she will be a powerhouse too; keep a look out for her. She weaned Firehawk off at 708 lbs. Firehawk also is in the top 10% for BW & MCE and top 15% for WW YW

Red YCR Fighting Texan 1814F is named after one of my favorite teams the Houston Texans. And like the Texans is in the top 15-30% for all the EPD's. The dam is also out of one of our original lines of cattle the Larkaba's some 24 yrs ago. This tells how strong the family is to make it this long and produce potential sires like Texan. Could be a heifer bull but probably recommend him on 2nd calvers. Actual WW was 698 lbs

Herd Sire

Now Red YCR Foggy Oasis 1842F is part of a plan to re-introduce our herd sire Red TR Oasis 142Y back into a few select cows. Plan came about because of the tremendous females Oasis has produced and are milking and producing all out MEAT. Foggy had a weaning weight of 714 and if you take note of the other Oasis calves you will see a MEAT trend and that's what it's all about.

Oasis provides another power bull; definitely not for heifers but if you want those consistent pounds come weaning day this is the guy. He will definitely introduce a little hybrid vigor and increase weaning weights. Do be scared by the big BW Oasis has 87 lbs and the dam side has averaged 90 lbs. Extra weight must have come from the hard winter and all the extra feed we put into these cows.

Well Freightliner is just what he was named. All power with a smooth ride. Another bigger BW bull from Oasis; this comes more so from the Lydian cow family but oh what awesome udders, and a cow family that does not have "sand" cracks; some are genetic. Power bull with a great maternal component to him. Oh.....did I ever mention Oasis is in the top 15% for Ribeye. Nice for the finishing end and remember this is a heritable trait too.

Falling A 1888F an APEX son out of a Brylor Annie; a SSS Arson daughter tremendous cow family and Annie 32Y fits right in. Falling A has a 92lb BW but don't shy away from that with the genetics behind him lower BW should be expected. He is still in the top 30% for BW so feel confident on using him on or 2nd calves for sure.

Red Carrier Bull
Remember if you use this bull on a black cow it will come out black; if there are any red genes in that pedigree you will get 50% Black and 50% Red calves. I don't normally have any of these outcross bulls but I wanted to try a few cows on the great JL Generation 6069 bull Linda bought from Johnston's Livestock in SK. Tremendous bull; usually a heifer bull but when I crossed him with my Red's hybrid vigor kicked in and we got a little more birth weight than anticipated. Good performance though top 8% WW, 10% YW, 7% REA, and 9% Carcass. Use him with confidence on your cows.

Notes

- TERMS & CONDITIONS -

Terms of Sale: The terms of the sale are cash or cheque, payable at par at the sale location. No release of livestock will be given until satisfactory settlement has been made. We reserve the right to withhold animals from shipment for which payments have not been received prior to departure time.

Certificates of Registry: A certificate of registry will be duly transferred to the buyer by the breeder for each bull after complete and full payment has been made.

Cattle Inspection & Identification: CCIA tags will be in all bulls. All bulls will be available for inspection prior to the sale.

Fertility: All yearlings will be scrotal measured and palpated prior to the sale and all yearling purchases will be semen tested prior to delivery. All bulls will meet or exceed breed standards.

Breeding Guarantee: We guarantee to provide you with a sound breeding bull, capable of passing a breeding soundness evaluation performed by a licensed veterinarian. In the unlikely event of any dispute, the regular terms and conditions that are standard with the Canadian Angus and Canadian Simmental Associations shall apply. Customer satisfaction is paramount to us.

Delivery of Bulls: We will offer free delivery within 200 km. of home; after that at cost. Delivery on the yearlings will commence early April unless prior arrangements have been made with the seller.

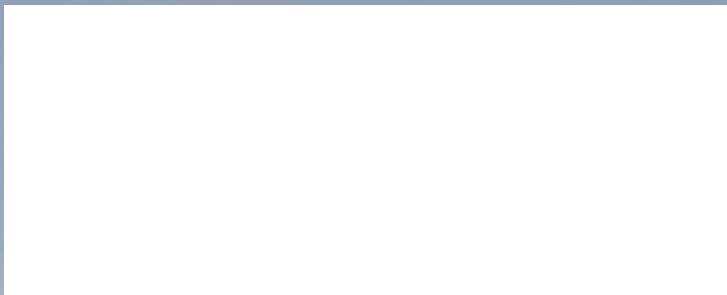

Post Sale Bull Development: We will winter your yearling bull purchases free of charge until April 1, 2019. After that, feed at cost of \$2/head/day will be charged. All bulls returning to the consignors' must be insured. All bulls will be housed at buyers' risk, the consignors will not be responsible for any type of injury while the bulls are in their care.

Bull Insurance: Ownership risk to the purchaser commences when the Auctioneer's gavel falls. Livestock coverage will be available at the clerk's desk from our appointed representative on Sale Day.

Accidents: Although every precaution will be taken to protect the safety and comfort of the buyers; neither the sale staff nor the owners assume any responsibility in this manner and disclaim any liability, legal or otherwise, in the event of an accident or loss of property.

Announcements: Any changes from information in this catalogue will be announced from the auction block. Such changes will take precedence over the printed matter in the catalogue and therefore buyers are cautioned to pay close attention to any such announcements.
