BREEDING SOUNDNESS EVALUATION 1239452

The Western Canadian Association of Bovine Practitioners
2286 Wheeler Street, Saskatoon, SK S7P 0J9 - September 2018

Owner: Jordan Kuipers Ear Tag Tattoo Brand 4F
 Address: _____ CCIA Tag _____ Breed: Angus
 Telephone: _____ Postal Code _____ Bull's Name _____ Age: 2yr
 Birth Date (Y/M/D): _____

I Sex Drive and Mating Ability Unknown Recent Observations
 Comments: (In most cases, the onus is on the producer to evaluate this important aspect of bull fertility)

II Physical Soundness Body Condition Score (1, 2, 3, 4, 5): 3 (A score of 1 is very thin, a score of 5 is very fat)
 All items listed below were examined and are normal unless otherwise indicated
 Eyes Feet Legs Accessory Sex Glands Inguinal Rings Penis Prepuce
 Scrotum Scrotal Shape Testicles Epididymides
 Comments: _____

Scrotal Circumference 41.5 cm
 Above Average Average ± 1 cm Below Average Below Minimum
 Comments: _____

III Semen Quality Collection Method: Massage EB AV (%) Sperm Abnormalities
 Response: Protrusion No Protrusion 15 Head DNR
 Volume: 2ml Ejaculate #1 _____ Ejaculate #2 6 Principal Piece _____
 Density: Very Good Detached Heads Normal
 Gross Motility: Very Good Proximal Droplets _____
 Individual Motility (%) _____ Acrosome _____
 Staining Alive (%) _____ 95 Normal
 Comments: _____

CLASSIFICATION: The results of this bull evaluation should in no way be used as a legal document certifying or condemning fertility. Rather, it is an evaluation guide to utilize the knowledge we currently have to discourage use of potentially inefficient sires. To the best of my knowledge, the results of this evaluation indicate that the potential breeding capacity of this bull is:
 Satisfactory Satisfactory is not a guarantee; observe breeding, watch for returns to heat
 Decision Deferred About 45, 60 and 75% are expected to pass at 12, 13 and 14 mo of age, respectively. Testing at under 12 months of age is not recommended.
 Questionable
 Unsatisfactory
